-FOR IMMEDIATE RELEASE-

Load Cell Calibrator-Model Calog-LC

The CALOG-LC hand-held precision calibrator unites features that usually involve multiple pieces of equipment into one easy to use hand held device. This combination makes the CALOG-LC ideal for testing 4 and 6 wire load cells, checking insulation breakdown, and for weighing system calibrations and simulations. It tests both zero and bridge balances, input and output resistance, 50V DC insulation test from bridge to shield, bridge to housing, and shield to housing. Featuring a rugged rubber protection cover housing and carrying case, precision mV and mA measurement and source circuits, rechargeable NiMH batteries, charger and management system, the versatile Load Cell Calibrator-CALOG-LC is sure to be a technician's constant companion.
