----- FOR IMMEDIATE RELEASE -----

PVS LOAD CELL SIMULATOR EASES SCALE TROUBLESHOOTING

Load Cell Central's PVS-10 transducer simulator is encased in a rugged ABS enclosure for use in the field and is designed with the scale technician in mind. This load cell simulator is ideal for troubleshooting scale indicators and verifying proper indicator setup. The vernier *provides infinitely variable adjustment* in coarse, medium or fine ranges, and is ideal for testing set points for batching, check weighing, and other load cell applications where relay outputs are used.

Complete, custom-engineered weighing systems and 24 hour technical support.

Load Cell Central, Box 91, Monroeton, PA 18832; <http://www.800loadcel.com>
