

Load Cell Central

1-800-LOADCEL

Economical Platform Scale

Model: HWP Series

Ranges from 30 to 600 KG (66 to 1,300 LB)

The HWP Series platform scale is designed with economics in mind, for light duty industrial applications where more rugged units are not needed such as our CWP/SWP Series scales. The strain gage area of the load cell is coated and sealed to provide an IP65 protection class rating. The scale has a stainless steel cover and can be used for parts counting, batch weighing, check weighing, or as a simple weight platform. Scales are supplied with a removable indicator column. Indicators are sold separately. When purchased with a Load Cell Central digital indicator or signal amplifier we will calibrate the scale system at no extra charge, for *plug and play operation*.
